Most cost estimates have remained static since the last presentation to the Committee. The cost estimates for the last three disasters have changed due to the damage estimates being formally written. These costs will be mostly finished by the end of January. FEMA projects the bulk of the cost estimating to be completed and will be closing their field office at that time.

All disasters with the exception of 1998, 4016, and 4018 have been approved for state share funding by the Executive Council. These disasters will be presented to the Executive Council for their approval in the month of January. These estimates are subject to change.

Presently, payments made to applicants by the Recovery Bureau of HSEMD are in line with the projections made by the Bureau.
